

Mazāks nodilums

Smērviela samazina kustīgo daļu nodilumu un efektīvi cīnās ar mitru, netīrumiem un koroziju.

Eļļošana darbības laikā

Ar automātisko eļļošanu nodrošināt ir neliels, taču ļoti daudzums darba laika, kas nodrošina havislabāko iespējamo smērvielu sadalījumu pa gultņu virsmu. Viens no galvenajiem ievērojamiem ieguvumiem ir eļļošanas laika samazinājums.

Nākotnes eļļošana ar U-ga

Ar U-ga eļļošanu nodrošināt ir neliels, taču ļoti daudzums darba laika, kas nodrošina havislabāko iespējamo smērvielu sadalījumu pa gultņu virsmu. Viens no galvenajiem ievērojamiem ieguvumiem ir eļļošanas laika samazinājums.

9. cēloņa ietekme uz vidi

Mazāks nodilums nodrošina ilgāku kalpošanas laiku un samazina augstāku traktortehnikas vai mašīnas atlikušo virsmu.

Mazāka ietekme uz vidi

Ar U-ga eļļošanu nodrošināt ir neliels, taču ļoti daudzums darba laika, kas nodrošina havislabāko iespējamo smērvielu sadalījumu pa gultņu virsmu. Viens no galvenajiem ievērojamiem ieguvumiem ir eļļošanas laika samazinājums.

TECHNICAL SPECIFICATIONS

Sūkņis:	Elektrisks vai pneimatisks
Eļļošanas punktu skaits	Atkarīgs no sūkņa, lielas sistēmas izveide ir iespējama
Kontrolē:	Digitālā kontroles iekārta ar iebūvētu atmiņu. Savienojums ar PLC iespējams.
uzkrāšanas trauka tilpums	2 - 200 kg
Izeja:	12 to 350 cc/min
Spiediens:	100 - 250 bar
Apkārtējā temperatūra:	-25 °C to + 70 °C (NLGI EP 2-grease)

Groeneveld Durability from within!

With almost 40 years experience, Groeneveld is developing products that help reduce our customers carbon footprint. Our products and solutions will contribute to the optimum efficiency of our customers, improving fuel consumption and reducing the waste of lubricants, all of which help contribute to a healthier environment.

At Groeneveld we not only provide our customers with solutions for efficiency, but also set high standards for ourselves internally. Groeneveld aims to optimize all business processes such as energy-efficient applications, the use of fully recyclable materials, waste management, education and training of staff.

Groeneveld Group 9001 certified - Groeneveld Italy 14001

Your efficiency is our challenge!

Greensight Active security system

.....

Greensight is a modular, active security system that can be composed of ultrasonic sensors, a full-color monitor, an incab display, a smart alarm and various cameras. Greensight helps you prevent damage and personal injury. Greensight can be applied in many ways in trucks, busses, garbage trucks, trains, off-road materiel, wharf cranes, etc. Greensight is the ultimate solution in areas with a high risk of injury or damage.

BreakAlube Preservation of wrecking hammers

.....

BreakAlube are indispensable when working with wrecking hammers. BreakAlube is a progressive grease pump and it has been used successfully for these heavy-duty and specialized applications for many years. BreakAlube is resistant to extreme operating conditions, ensuring high operational safety and a long life. Important parts of the pump, such as the pump element and the bearings of the drive shaft, have been developed especially for heavy-duty working conditions. BreakAlube can build up a working pressure of up to 275 bar and it is suitable for greasing up to NLGI class 2, also with additives such as graphite and copper.

Oilmaster Oil level management

.....

Oilmaster reduces the need for manually checking the oil level and topping up between surface intervals. This innovative product guarantees carefree oil management with reduced maintenance costs, oil consumption, time loss and environmental impact, and constant oil quality. Oilmaster is used in the transport, off-road sectors and in stationary installations.
